

Postharvest Unlimited

ISHS International Conference

Program

10-13 June 2014 • Cyprus

Welcome

Dear colleagues,

It is our pleasure to welcome you in the V International Postharvest Unlimited Conference, held under the auspices of the International Society for Horticultural Science (ISHS). The Conference is a joint initiative of the Cyprus University of Technology, Department of Agricultural Sciences, Biotechnology & Food Science and the Mediterranean Agronomic Institute of Chania, Greece.

Towards the establishment of new links and collaborations among participants, the Conference aims to bring together researchers from diverse fields of study who share a common interest in postharvest science. The conference will provide the opportunity for scientists, professionals and students to present their latest findings and discuss their current work related with basic and applied aspects in postharvest issues. We hope the meeting will promote the exchange of ideas and international cooperation and collaboration among researchers.

The Conference is comprised of 17 plenary lectures, 68 oral presentations and 140 poster presentations that are expected to provide new knowledge and promote scientific dialogues during the conference. Exceptionally, this event is supported by the COST Actions FA1104 'Sustainable production of high-quality cherries for the European market' and FA1106 'An integrated systems approach to determine the developmental mechanisms controlling fleshy fruit quality in tomato and grapevine'.

We endeavour to offer a high-quality and interesting program with renowned keynote speakers, as well as an attractive social program during the conference.
