

## DIACTMOND NEWSLETTER 3

MAY 2021

Dear DIACTMOND Colleagues and Friends,

In the meantime, between January – May 2021, various activities have been performed and other are under way.

In addition, having reached the half of the distance of the project life, the midterm report had to be prepared.

- **The Project Midterm Report ...**

has been submitted to the Research and Innovation Foundation (our funding body), thanks to the effective cooperation with our Industrial Partners EMBIO Diagnostics. No problems were appeared in the process and we expect to hear from ΙΔΕΚ in the following month or so.

- **The covid19 pandemic has eventually affected our operations ...**

and a 6-month extension has been asked, and granted by the Research and Innovation Foundation.

We expect that this extension will allow our activities to be completed as planned.

- **Current work on device, testing and system software ...**

Is underway (WP4 - System Hardware, WP5-In vitro testing of the system, and WP6-System Software Development). The relevant partners are collaborating for the completion of the tasks and communicate through the Slack platform.

- **One more publication ...**

has been produced recently on blood Coagulation Algorithms, by Louka and Kaliviotis (doi: 10.3390/bios11040113).

- **Three abstracts are in preparation ...**

for submission in the Joint Congress of the European Society for Clinical Hemorheology and Microcirculation, the International Society of Biorheology and the International Society for Clinical Hemorheology in Fukuoka-Japan (on-line event): <http://www.congre.co.jp/eschm-isch-isb2021/index.html>. The relevant partners will be contacted soon.

That is all for now. We will keep you updated with more news soon.
